

NEW!

Scan-to-Order app

Better, faster and easier ordering on the move

FAST FACTS

- > New Scan-to-Order app for iOS/Android devices
- > Mobile-friendly for ultimate flexibility
- > Easier ordering with minimum data entry
- > Streamlined process
- > Lower administrative workloads

The Avery Dennison Scan-to-Order app is one of the easiest ways to place orders, return to unfinished orders and review your recent orders submitted using your mobile device.

You can now order simply by scanning a barcode, or by entering the product/EAN code. The app is available on the Apple App Store and Google Play, and is compatible with both iOS and Android devices. It's a great way to order when you're on the move, with data going straight into Avery Dennison's order execution system.

STRAIGHT FROM BARCODES

Pointing your device at the EAN barcode on an Avery Dennison roll gives you immediate access to a product, and you can then enter your desired width, length, quantity and delivery date. Just add all of the products you need (whether one or many) and then enter an order number if applicable and submit.

PRODUCT CODES TOO

The same process applies to manual entry of product/EAN codes – and you can use a mixture of barcode scans and manual code entry during a single order if you need to.

RECENT ORDERS

A "Recent Orders" option means you review your most recent orders submitted from your mobile device.

SHOPPING CART

Unfinished orders are stored, so you can go back later to finalise and submit.

A comprehensive help file is included, and your usual Customer Service Representative will be happy to help with any questions.

Go to App Store, Google Play or scan the QR code below.

All Avery Dennison's products are sold subject to Avery Dennison's general terms and conditions of sale, see [terms.europe.averydennison.com](https://www.averydennison.com/terms.europe)
